## COURSEWORK

### UNDERGRADUATE

Computational Linear Algebra

Data Types & Structures

Computational Mathematics

Computational Physics I & II

### COURSERA

The Data Scientist's Toolbox

R Programming

Getting and Cleaning Data

Statistical Inference

## SKILLS

### PROGRAMMING

Languages

JavaScript • Python • MATLAB

Java (Android) • R • Fortran

Tools

Sublime Text • Git • Android Studio

Markup

HTML (Jade, Handlebars) •  $\text{\LaTeX}$

## EXPERIENCE

### UNIVERSITY OF WATERLOO

COMPUTATIONAL OCEANOGRAPHER

Jan 2015 – Apr 2015 | Waterloo, ON

- Parallelizing numerical methods to solve the Navier-Stokes equations and attempting to scale them unto large multicore systems

### TEACHING ASSISTANT

Sept 2013 – Dec 2013, Sept 2014 – Dec 2014 | Waterloo, ON

- Assistant for Physics 1 and Computational Physics 1
- Directed interactive help sessions, provided assignment help and aided in the teaching of physical and programming concepts

### COMPUTATIONAL ASTROPHYSICIST

May 2013 – Aug 2013 | Waterloo, ON

- Analyzed the distribution of noise and discovered significant substructure within galaxy clusters using Python's numerical libraries
- Quickly adapted to the Ubuntu operating system and worked extensively with astronomy software

### LABORATORY ASSISTANT

May 2012 – July 2012 | Waterloo, ON

- Collaborated with coworkers in the design and creation of parallel-plate capacitors that would operate as ultra-cold temperature thermometers

## PROJECTS

### NUMBERS.JS

- The most popular numerical library for JavaScript and NodeJS
- Currently the lead developer and responsible for maintaining documentation

### NODE-EMAIL-VERIFICATION

- Easily send verifications to users after signup using Node and MongoDB

### ROOMSURFER

- A web application that allows University of Waterloo students to find rooms on campus to study in

## AWARDS
